Welcome to The Cauzin Family

Welcome to the world of data strips. You now own a piece of a revolutionary technological advancement that bridges the gap between print and electronic media more quickly and easily than ever before.

Each data strip package contains selected highlights from among the best software each publisher has to offer.

We at Cauzin, hope you'll enjoy this software package, and believe you'll find data strips to be very practical and useful.

Your comments and ideas on this package or any additional applications you'd like to suggest, would be greatly appreciated.

Please send your comments or remarks to:

PORTFOLIO EVALUATION

by Robert Flast and Lauren Flast

The two models presented here will help you evaluate your personal portfolio. They are templates for use with Lotus 1-2-3™. The first keeps track of your stocks and mutual funds. The second monitors your bonds.

Each model is divided into two main sections, one for historical data and the other for current data. They both permit the tracking of an index (such as the Dow Jones Industrials or the Standard & Poor's 500), as well as each stock or bond. They also calculate the difference between the buy and sell dates to determine whether you are subject to short- or long-term capital gains or losses.

The individual records represent buy transactions, so when you sell only a portion of a holding, add a new row for the balance of the holding and change the quantity bought in the original row to the same value as the quantity sold. In this way the profit or loss from each sale can be properly reflected. If you insert additional rows for any purpose, you must be sure to copy or adjust all the necessary formulae.

To simplify these models, you must keep track of dividend and interest accumulations instead of using a set of macro commands to update accumulating fields. In other words, when a dividend is paid, you should simply add its value to the CUMULATED DIVIDEND field for the stock record. When you receive interest paid on a bond, you should make a similar change to the bond model.

EVALUATING A STOCK PORTFOLIO

The first model, STOCK.WKS, tracks your brokerage account, self-directed IRA, and mutual funds. Use this template to maintain and analyze your account records.

Move through this worksheet using standard Lotus commands. Begin by entering basic information, using one row for each transaction.

A-name of the stock
H-date of purchase (YYMMDD)
I-purchase price per share
J-number of shares purchased
L-commission for purchase
M-index on day of purchase (option)
N-latest dividend (option)

Once the data is saved to a disk, you can Retrieve the worksheet at any time. By entering the current price of your holding in column B and the current value of your index in column F, you have an instant evaluation of your entire portfolio on any given day.

PRICE	QUANTITY	VALUE	COMMIS.	INDEX	LATEST DIVIDEND	%YIELD	CUMULATED DIVIDEND
26.00	100.00	2600.00	45.00	1175.00	1.25	5.43	33.00
29.00	100.00	2900.00	45.00	1175.00	ENTER #	0.00	ENTER #
59.00	200.00	11800.00	130.00	1260.00	ENTER #	0.00	ENTER #
ENTER #	ENTER #	0.00	ENTER #	ENTER #	ENTER #	ERR	ENTER #
ENTER #	ENTER #	0.00	ENTER #	ENTER #	ENTER #	ERR	ENTER #
ENTER #	ENTER #	0.00	ENTER #	ENTER #	ENTER #	ERR	ENTER #
		17300.00	220.00				33.00

Based on the information you put into the model, figures are calculated in the following columns:

C-present value of the stock
D-present profit or loss
E-percent of change since purchase
G-change in index since purchase
K-original price of stock
O-yield, based on dividend and price

When you sell off your position in a stock, enter that information in the following columns:

Q-date of sale (YYMMDD)
R-price per share
S-number of shares sold
U-commission on sale
V-index on day of sale (option)

Lotus uses information on the sale to calculate:

T-value of sale
W-capital gain or loss
X-short-term or long-term

BOND PORTFOLIO EVALUATION

Since bonds use different criteria for analysis and comparison, you need a slightly different worksheet for a bond portfolio. The second model, BOND.WKS, provides the template you need to work with bonds.

This is the basic information needed for every purchase and the columns where the data should be entered.

A-name of bond
H-date of purchase (YYMMDD)
I-interest rate
J-years to maturity
K-par value
L-number purchased
N-commission
O-quote per bond
S-index on purchase day (option)
U-accumulated interest (option)

Lotus will use your data to calculate the following:

C-current value
D-capital gain or loss
E-percent change since purchase
G-percent change in index
M-value if held to maturity
P-original cost per bond
Q-net cost of bonds
R-total cost
T-annual interest
V-yield to maturity

After you sell a group of bonds, the worksheet can analyze the sale and give you a place to record that information.

CAUZIN'S CORNER...

and now for something slightly different

As your portfolio grows, you need to add new rows to your model. Also, if you sell off only part of your block of stocks or bonds, you need to use more than one row. The steps below show how to add rows to the BOND PORTFOLIO. Use the same techniques for the STOCK PORTFOLIO.

First, since the worksheet is protected, you'll have to turn off the protection. Follow this sequence:

/Worksheet
Global
Protection
Disable

Now you are ready to add rows. If you add rows at the very bottom of the worksheet, you will have to correct the formulae in line 20 to include the new rows. However, if you add rows within the worksheet, the formulae are automatically updated. You add rows just above the final line with this sequence:

/Worksheet Insert Row A18..A19
/Copy A16..AL17 A18..AL19

The models reflect the definition of "short-term" and "long-term" that was used when they were written. As tax laws change, you will have to update this formula. In the STOCK PORTFOLIO this is in column X. Look in column AF to update the BOND PORTFOLIO.

Reading STOCK PORTFOLIO

The following data strips contain STOCK.WKS, a template for Lotus 1-2-3™. We've numbered each data strip in the order it must be read into your computer.

After you've read in the strips, the file will be on your data disk. Bring the template into 1-2-3 by using the Retrieve command from the File menu of Lotus. The model already contains a few entries as examples. Use the standard Lotus commands to personalize the portfolio.

Introducing StripWare™

“The Best of Both Worlds”

There's a world of Softstrip data strips
coming your way.

Besides being in magazines
and books, data strips
are now available
in many exciting
Cauzin StripWare titles.

StripWare offers
a wide range
of the best programs
from some of the
world's leading
computer magazines,
books, and authors.

Softstrip™
COMPUTER READABLE PRINT

LIMITED WARRANTY

CAUZIN SYSTEMS, INC. (CAUZIN) warrants this package against defects in materials and workmanship for a period of 90 days from the date of original purchase.

If you discover a defect, CAUZIN will, at its option, either repair, replace, or refund the purchase price of this product at no charge to you, provided it is returned during the warranty period indicated above or any extended period(s) paid for by the user. Transportation charges should be prepaid, to the authorized dealer from whom you purchased it or to any other authorized CAUZIN dealer in the country.

You may obtain additional information from CAUZIN directly at the address printed on this certificate, or by calling (203) 573-0150. Please attach your name, address, telephone number, a description of the problem, and a copy of a bill of sale as proof of date of original purchase, to each product returned for warranty service.

This warranty applies only to products manufactured by or for CAUZIN, which can be identified by the CAUZIN

Cauzin StripWare™

trademark, trade name, or logo affixed to the product. CAUZIN does not warrant any product(s) that are not CAUZIN products. This warranty does not apply if the product has been damaged by accident, abuse, misuse or misapplication, has been modified without the written permission of CAUZIN, or if any CAUZIN serial number has been removed, altered, or defaced.

ALL WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED IN DURATION TO 90 DAYS FROM THE ORIGINAL DATE OF PURCHASE. THERE ARE NO WARRANTIES WHICH EXTEND BEYOND THE DESCRIPTION ON THE FACE HEREOF.

THE WARRANTY AND REMEDIES SET FORTH ABOVE ARE EXCLUSIVE AND IN LIEU OF ALL OTHERS, ORAL OR WRITTEN, EXPRESSED OR IMPLIED. NO CAUZIN DEALER, AGENT, OR EMPLOYEE IS AUTHORIZED TO MAKE ANY MODIFICATION, OR ADDITION TO THIS

WARRANTY.

CAUZIN IS NOT RESPONSIBLE FOR SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES RESULTING FROM ANY BREACH OF WARRANTY, OR UNDER ANY OTHER LEGAL THEORY, INCLUDING LOST PROFITS, DOWNTIME, GOODWILL, DAMAGE TO, OR REPLACEMENT OF EQUIPMENT AND PROPERTY, AND ANY COST OF RECOVERING, REPROGRAMMING OR REPRODUCING ANY PROGRAM OR DATA STORED IN OR USED WITH CAUZIN PRODUCTS.

Some states do not allow the exclusion or limitation of incidental or consequential damages or limitations on how long an implied warranty lasts, so the above limitations or exclusion may not apply to you.

This warranty shall not be applicable to the extent that any provision of this warranty is prohibited by an federal, state or municipal law which cannot be preempted. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.
